

Autistic Girls and Women: Celebrating Strengths and Supporting Needs

presented by Dori Zener, RSW

This presentation offers valuable insights into the unique experiences, strengths, and shared characteristics of autistic girls and women, shedding light on why this demographic often goes unnoticed, resulting in delayed or missed diagnoses. Pulling from the clinical career of social worker Dori Zener, viewers will gain a deeper understanding of the needs of neurodivergent girls and women and acquire practical guidance to help them flourish.

Dori Zener is a registered social worker who has dedicated her career to creating Neurodiversity-Affirming mental health opportunities for autistic people across the lifespan. She is deeply passionate about fostering autism acceptance and actively contributes to expanding the understanding of autism through publications, workshops, research collaborations and corporate consultations.
